

Below are the instructions for setting up the environment: Also, you can check tutorial on [YouTube](#).

Step 1: Download XAMPP from <https://www.apachefriends.org/>

Step 2: Configure XAMPP (open httpd.conf - Apache server configuration)

Search for **Listen 80** and change port to **81**

Step 3: phpmyadmin - Database setup for Demo apps

a. Access <http://localhost:81/phpmyadmin/index.php>

b. Click on New and Create database **basics**

c. Click on database **basics** from left panel, then click **SQL** tab on right panel and execute following queries:

```
CREATE TABLE jsdemo(fname VARCHAR(30),lname VARCHAR(30),address VARCHAR(250),phone VARCHAR(10));
```

```
CREATE TABLE dbdemo(fname VARCHAR(30),lname VARCHAR(30),address VARCHAR(250),phone VARCHAR(10));
```

d. Click on New and Create database **vsocial**

e. Click on database **vsocial** from left panel, then click **SQL** tab on right panel and execute following queries:

```
CREATE TABLE users(username VARCHAR(30),password VARCHAR(35),fname VARCHAR(30),lname VARCHAR(30),address VARCHAR(250),pic VARCHAR(250));
```

```
CREATE TABLE admins(username VARCHAR(30),password VARCHAR(35),role CHAR(1),fname VARCHAR(30),lname VARCHAR(30),address VARCHAR(250),pic VARCHAR(250));
```

```
CREATE TABLE bloggers(username VARCHAR(30),password VARCHAR(100),fname VARCHAR(30),lname VARCHAR(30),address VARCHAR(250),pic VARCHAR(250));
```

```
CREATE TABLE blogs(author VARCHAR(30),title VARCHAR(250),body VARCHAR(1500));
```

```
CREATE TABLE messages(username VARCHAR(30),message VARCHAR(500),sender VARCHAR(30));
```

```
CREATE TABLE logs(url VARCHAR(200),timestamp VARCHAR(50),description VARCHAR(2000));
```

```
INSERT INTO `admins`(`username`,`password`,`role`) VALUES('admin','admin','A');
```

```
INSERT INTO `admins`(`username`,`password`,`role`) VALUES('Steve','steve','A');
```

```
INSERT INTO `admins`(`username`,`password`,`role`) VALUES('Bob','bob','A');
```

```
INSERT INTO `admins`(`username`,`password`,`role`) VALUES('Super','super','S');
```

Step 4: Download Demo App from

<https://github.com/sarwarjahanm/vSocial>

Step 5: Extract the Demo app content in XAMPP-htdocs folder C:\xampp\htdocs\vsocial

Step 6: Access Demo Apps using Browser

<http://localhost:81/Vsocial/Home.php>
